# Foreign Agricultural Trade of the United States

May-June 1985

\*\*\*\*\*

IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

\*\*\*\*\*

\* Foreign Agricultural Trade of the United States is published six times a  
 \* year with two supplements. Subscription prices are \$21 a year domestic  
 \* and \$26.25 foreign (prices subject to change). Send check or money order  
 \* payable to "Superintendent of Documents" to Superintendent of Documents,  
 \* U.S. Government Printing Office, Washington, DC 20402. For faster  
 \* service, call (202) 783-3238 and charge your subscription to your VISA,  
 \* MasterCard, or GPO Deposit Account.

\*\*\*\*\*

IS IT TIME TO RENEW?

\*\*\*\*\*

\* Your subscription to this publication may be due to expire soon. If so,  
 \* you will get a renewal notice in the mail from GPO about 90 days ahead of  
 \* time. Only one notice is sent. You must return it promptly to ensure  
 \* uninterrupted service. If you have misplaced your renewal notice, use the  
 \* form on the back of this report. Be sure to attach mailing label.

Prepared by the World Analysis Branch, International Economics Division,  
 Economic Research Service, U.S. Department of Agriculture. Principal  
 coordinators were Edward C. Overton, Thomas A. Warden, and Thomasine B.  
 McCall. Mary L. Fant provided statistical support. Sue Daigrepoint provided  
 word processing and table formatting support. Editorial support was provided  
 by Linda L. Hatcher, Research Information Branch, Economics Management Staff.  
 Data processing support was provided by Sharlan Lindow and William Meiller,  
 International Economic System Branch, Data Services Center, and Penni Korb,  
 World Analysis Branch.

# Digest

Increased World Production, Lower Prices Depress Ag Exports (see p. 2).

Increased world agricultural production and lower prices helped depress U.S. agricultural exports for the first 7 months of fiscal year (FY) 1985 (October 1984-April 1985). Export value dropped 10 percent below that of the same period in 1984 to \$21.6 billion. Volume fell slightly to 88 million tons, as a jump in corn and sorghum exports failed to offset lower shipments of wheat, soybean meal, soybeans, and barley.

Imports Continue Strong (see p. 67). Increased consumer demand, freeze damage to Florida's winter fruit and vegetable crops, and higher prices pushed U.S. farm product imports to \$11.8 billion during the first 7 months, a 7-percent gain over year-earlier levels. Rising values for cocoa products, fruit juices, fresh fruits, tea, spices, vegetables, beef, pork, live hogs, dairy products, and grains accounted for most of the gain. Brazil, Canada, Mexico, Australia, Colombia, and Indonesia supplied nearly 40 percent of the imports.

Dollar Down Sharply (see p. 107). The U.S. dollar fell sharply during March and April against the five major foreign currencies most important in agricultural trade. The downturn, after a 3-month period of strong advance, resulted from reports of sluggish first-quarter economic growth and lower interest rates on dollar deposits in Eurocurrency markets.

Government-Assisted Exports Fell in 1984 (see p. 111). U.S. agricultural exports assisted by Commodity Credit Corporation programs totaled over \$3.6 billion during FY 1984, down 10 percent from FY 1983's record-high of nearly \$4.1 billion. Reductions in coarse grains, oilseeds, and wheat flour more than offset increases for wheat, rice, cotton, and tobacco.

Exports to USSR Almost Doubled in 1984 (see p. 114). Increased U.S. grain exports pushed U.S. agricultural exports to the USSR to over \$2.8 billion in calendar year 1984. Grains accounted for over 90 percent of U.S. agricultural exports to the USSR, and agricultural exports accounted for over 85 percent of all U.S. exports to the USSR.

See inside back cover for correction to Foreign Agricultural Trade of the United States, Fiscal Year 1984 Supplement.

# Increased World Production, Lower Prices Depress Ag Exports

U.S. agricultural export value for the first 7 months of fiscal year (FY) 1985 (October 1984-April 1985) dropped 10 percent below that of the same period in 1984 to \$21.6 billion. Export volume fell slightly to 88 million tons, as a jump in corn and sorghum exports failed to offset lower shipments of wheat, soybean meal, soybeans, and barley. Shipments of wheat flour, rice, and cotton also declined slightly, while shipments of tobacco, vegetable oils, and sunflowerseeds increased.

## World Production Rises

World agricultural production in 1984 surpassed 1982's record high, depressing import requirements in several important U.S. markets overseas. Higher world supplies have pushed prices and export values down in FY 1985. Lower prices were the primary factor behind a \$579-million drop in Japan's purchases from the United States in the first 7 months of 1985, while declining import needs and lower prices pushed exports to Western Europe down \$1.5 billion. Exports to India and China dropped substantially, but the export value to the Soviet Union exceeded the year-earlier level by over \$570 million, following a poor Soviet grain crop.

## Soybean Export Value Largest Decline

U.S. soybean export value dropped nearly \$1 billion below the year-earlier level because of weak importer demand and lower prices. Led by a 730,000-ton drop in exports to Western Europe, soybean export volume for the first 7 months of FY 1985 even fell below the depressed tonnage of the same period in 1984. Record-high European grain and oilseed production, the European Community's (EC's) dairy-reduction program, the lack of Soviet meal imports from Western Europe, and intense competition from South American oilseeds have dramatically reduced demand for U.S. soybeans in Western Europe. Further, the Soviet Union imported no U.S. soybeans during the 7-month period compared with its purchase of 416,000 tons of U.S. soybeans a year earlier. U.S. soybean exports to Japan increased only slightly over those of the same period in 1984 because of slow growth in compounded feed production and substitution of fish and rapeseed meals. As a result, Japanese imports of U.S. soybeans remained below 1983's levels.

Mexico, the only major exception in an otherwise sluggish export picture for soybeans, increased its imports of U.S. soybeans almost 100 percent, or over half a million tons. Exports also rose slightly to Korea and Taiwan.

## Wheat Volume Leads Declines

U.S. wheat export volume declined nearly 3 million tons, or 14 percent, from the year-earlier level. The \$600-million drop in value was even greater, as record-high world supplies heightened competition and depressed prices. U.S. wheat exports in March 1985 dropped to their lowest monthly level in the last 8 years, and April's exports were only slightly higher. The largest declines during FY 1985's first 7 months were in exports to India and China, where repeated years of strong production have dramatically reduced import needs. Imports of U.S. wheat fell about 1 million tons to India and 1.5 million tons to China. On the other

hand, poor crops in Brazil and Bangladesh led to export increases of about 850,000 and 600,000 tons, respectively. Higher local food grain production reduced U.S. wheat exports to Indonesia, Chile, Portugal, and Ecuador. Purchases by the Soviet Union tapered off through the year, drying up entirely in March, and October-April wheat exports to the Soviets fell over 900,000 tons.

Increased competition further constrained U.S. wheat exports during the first 7 months of FY 1985. China imported wheat for its urban areas, despite record production, but none from the United States since January. U.S. exports to Turkey increased only 34,000 tons, despite increased import needs; lower prices from Argentina and the EC hampered U.S. sales there.

#### Soviet Corn Purchases Strong

U.S. coarse grain exports, the major exception to generally slower exports this year, rose 3.6 million tons, or 10 percent, largely because of unusually heavy corn shipments to the Soviet Union. Export value fell \$446 million, however, as sharply lower prices more than offset the increase in volume. Soviet grain imports from all sources are expected to reach a record high this year, and Soviet imports of U.S. coarse grains were 8.1 million tons higher through April. Exports also increased to Taiwan as importers built stocks, but the increases were of a much smaller scale and have tapered off in recent months. In North Africa, expanded livestock and poultry feeding led to increased U.S. exports, while credit guarantees facilitated increased sales to Iraq.

Coarse grain exports to most other destinations fell, however. Increased production in other countries both reduced import needs and increased competition. China has recently become a competitor, and record Chinese exports are partly responsible for sluggish U.S. exports to Japan and lower exports to Korea. Korea's use of feed wheat also lowered coarse grain import needs. Coarse grain production in Spain and the EC reached record highs this year, and their imports from the United States subsequently dropped about 1.7 million tons. Improved local crops also reduced U.S. corn exports to Mexico and South Africa another 1.7 million tons.

#### Sorghum Exports Strong

Although Soviet purchases of U.S. corn were the most important source of increased coarse grain volume during the first 7 months of FY 1985, sorghum exports rose 30 percent, or 1.2 million tons, none of which went to the Soviet Union. Japan's imports of U.S. coarse grain neared year-earlier levels only because a 900,000-ton increase in sorghum tonnage helped offset a larger decline in corn. A similar switch, on a smaller scale, occurred in Venezuela, and Mexico's sorghum imports rose slightly. Exports to Sub-Saharan Africa also rose as drought relief efforts got underway, with the Sudan receiving most of the increased tonnage. Only in Europe did U.S. sorghum exports experience a major decline, with Spain importing 265,000 tons less than a year earlier.

#### Demand Slack for Soybean Meal

U.S. exports of soybean meal and of other feeds and fodders (mostly corn gluten) fell \$379 million and \$149 million, respectively, during the first 7 months. Soybean meal prices were at their lowest levels in a decade, and demand for both meal and other feeds and fodders dropped as European grain and oilseed production climbed. Especially low shipments to West Germany of both commodities overwhelmed small export increases to Iraq.

# Vegetable Oil and Tobacco Up

U.S. vegetable oil exports increased \$35 million during the 7-month period as tight world supplies drove up prices and import needs. In contrast to soybean meal prices, soybean oil prices reached record highs, and export volume rose. India and Pakistan's imports of U.S. vegetable oils dropped, but higher shipments to Latin America, the Soviet Union, and Sub-Saharan Africa more than offset the decline.

Tobacco exports rose over year-earlier levels as U.S. crop quality improved and Egypt made large purchases under the Export Credit Guarantee Program (GSM-102). A large increase in shipments to West Germany offset lower Spanish imports.  
(Stephen MacDonald, World Analysis Branch)

## Imports Continue Strong

U.S. farm product imports rose 7 percent to \$11.8 billion in the first 7 months of fiscal year (FY) 1985 (October 1984-April 1985) from \$11 billion during the same months a year earlier. Higher prices accounted for the gain, as volume declined for some major commodities. Value increases were recorded in many competitive and noncompetitive products, such as fruit juices, fresh fruits, vegetables, cocoa products, beef, pork, dairy products, hides and skins, live hogs, grains, spices, and tea.

Farm product imports in March reached \$1.9 billion, the highest monthly level since April 1984 and 12 percent above March 1984. Agricultural imports during April, however, dropped to \$1.7 billion. Competitive commodities in the first 7 months rose 8 percent to \$7.8 billion, while noncompetitive items reached \$4 billion. U.S. farm product imports from developing nations, accounting for 59 percent of imports from all areas, totaled \$7 billion compared with \$4.6 billion from developed nations. Imports from Brazil, the single largest supplier, climbed 42 percent in value during the October-April period, reflecting higher values for coffee, orange juice, and cocoa products. Imports from Canada, the second largest source of agricultural imports in this period, gained 19 percent in value, primarily because of larger shipments of pork, live hogs, beef, and live cattle. Agricultural imports from Mexico fell 10 percent in value, mainly because of lower values for coffee and reduced live cattle exports to the United States. The relative position of Colombia gained, but Australia and Indonesia fell principally because of reduced shipments of beef, rubber, and coffee.

### Noncompetitive Imports Continue To Rise

Noncompetitive imports reached \$4 billion during the first 7 months of FY 1985, 5 percent higher than those of a year earlier. Coffee import values declined slightly to \$1.9 billion. Quantity dropped 2 percent to 645,000 tons, while unit import prices averaged about the same at \$1.32 per pound. Brazil, Colombia, Mexico, El Salvador, Guatemala, Ecuador, the Ivory Coast, and Indonesia were major coffee suppliers.

Values for natural rubber imports fell 16 percent to \$435 million during the first 7 months because of lower prices, as tonnage remained near 493,000 tons. Because of larger supplies, prices will likely weaken further in FY 1985. About 61 percent of the rubber came from Indonesia, with most of the remainder from Malaysia.

U.S. cocoa and product imports rose nearly 38 percent to 344,000 tons, as importers and manufacturers replenished their stocks. Import values escalated to \$805 million compared with \$552 million in the same period last year. Imports were led by higher values for cocoa products, especially sweetened chocolate, cocoa powder, and confectionery products. Cocoa bean imports rose 63 percent to 172,000 tons. The New York cocoa futures price declined from an average \$1 per pound in October 1984 to 97 cents in April 1985, mainly due to larger world supplies. The Ivory Coast, Brazil, Ecuador, the Netherlands, and Canada were major sources.

Values also increased for bananas, spices, and tea. Cumulative banana imports totaled \$427 million compared with \$410 million in comparable months last year. Central and South America supplied nearly all of the bananas.

### Competitive Imports Continue Upward

Competitive imports expanded 8 percent during the first 7 months of FY 1985 to \$7.8 billion. Beef imports increased 3 percent in value to \$699 million as a 7-percent decline in unit prices was offset by a 10-percent rise in volume to 352,000 tons. Increased export availabilities in Australia, rising demand for manufacturing-grade beef, and lower U.S. beef output are expected to further strengthen beef imports later in FY 1985. Australia supplied 37 percent of the beef import volume, with New Zealand and Canada making up another 25 and 15 percent, respectively.

The strength of the U.S. dollar and reduced U.S. production contributed to pork imports valued at \$505 million, up 37 percent from the same 7 months of FY 1984. Pork volume climbed 43 percent to 242,000 tons, with import unit prices falling 4 percent to \$2,086 per ton (95 cents per pound). Canada supplied 42 percent of all pork imports, with Denmark, Poland, and Hungary the other principal suppliers.

Sugar imports in the first 7 months of FY 1985 tumbled to \$592 million; volume plunged 23 percent to 1.5 million tons. Principal sugar suppliers were the Dominican Republic, Brazil, the Philippines, Australia, and Argentina.

Consumer demand for fruits and preparations pushed up import values 65 percent to \$1.1 billion, chiefly because January's freezing temperatures damaged U.S. fruit crops, resulting in higher prices. Concentrated orange juice from Brazil, more than doubling in value, accounted for the major jump. Fruit juice import volume surged 44 percent above year-earlier levels, totaling 22.2 million hectoliters. Higher prices boosted values 86 percent to \$648 million. Canned pineapples from the Philippines, fresh grapes from Chile, and melons from Mexico accounted for most of the other gains in imports of fruits and preparations. Higher prices boosted U.S. vegetable imports 4 percent to \$903 million during the first 7 months of FY 1985. Import unit prices for vegetables rose 5 percent.

Oilseed and product values declined 1 percent to \$471 million, due mainly to lower volume. Because of larger oilseed supplies, U.S. coconut oil imports diminished 11 percent in value to \$178 million; volume dropped 27 percent to 205,000 tons. However, palm and palm kernel oil import values increased. Malaysia supplied the bulk of these imports.

Dutiable cattle entries in the first 7 months fell sharply to 375,000 head (\$165 million) from 601,000 head (\$193 million) a year earlier. Canada shipped 260,000 head to U.S. markets during the 7-month period compared with 180,000 head during 1984. Because of its export restrictions, Mexico shipped only 115,000 head, down sharply from 1984's 421,000 head. Live hogs from Canada skyrocketed to 1 million head compared with 483,000 head a year earlier.

Cheese imports, accounting for 47 percent of dairy product imports, declined 6 percent in value to \$216 million because import unit prices fell 5 percent to \$1.24 per pound. Western Europe and New Zealand shipped most of the cheese.

Wine and malt beverage imports remained about the same at \$843 million in the first 7 months of FY 1985. Volume gained 4 percent as import unit prices declined 3 percent. Italy, France, and West Germany are the major suppliers of wine, with the Netherlands, Canada, and West Germany providing most of the malt beverages. Values declined for unmanufactured tobacco because of weaker demand for machine-threshed leaf. Other competitive imports, such as grains, feeds, cut flowers, confectionery products, and nursery stock, increased. (Charles E. Goode, World Analysis Branch)

# Dollar Down Sharply

January-April 1985 saw two sharp and strongly divergent movements in the foreign exchange value of the U.S. dollar. Both news and expectations of strong growth in the U.S. economy accompanied the upsurge in the value of U.S. currency from January through early March. The dollar fell dramatically in the last 3 weeks of March and into April as the domestic economic picture showed signs of sluggishness.

## The November-March Dollar Bull Market

The U.S. dollar appreciated strongly from November 1984 through early March 1985 against all five currencies most important to U.S. agricultural trade because of anticipated strong U.S. economic growth. Rapid growth was expected to keep interest rates high (or rising) and to attract foreign investors. High rates of return, or promises of high rates of return, make the dollar more desirable.

Many expected that a strong economy would coincide with the continued restraint of the Federal Reserve; that the Federal Reserve was using monetary policy to continue the fight against inflation; that other potential objectives of monetary policy, such as the level of interest rates, were of secondary importance; and that, in particular, the dollar's value was less important than continued stabilization of the rate of price increases.

The latter point was effectively emphasized when currency traders reacted with disdain to the February intervention by the central banks of West Germany, Great Britain, Japan, and the United States. The concerted activity of these monetary authorities was to try to bring down the dollar's value by placing more in circulation. Traders, however, simply took positions opposite the direction of the central banks, exaggerating the bull market in dollars.

The Federal Reserve's action lacked credibility in foreign exchange circles. It could not simultaneously expand the number of dollars available (through intervention) and still concentrate on stabilizing the growth in monetary aggregates. The general view had it, then, that the supply of dollars was being increased via (general) central bank action and reduced through Federal Reserve activity to control the growth rate of the major measures of the money supply.

## Dollar Adjusts in March-April

The recent downturn in the value of the dollar is the direct result of softer interest rates on dollar deposits in Eurocurrency markets, the banking crisis in Ohio, and reports of sluggish first-quarter economic growth.

Lower interest rates imply that the Federal Reserve has eased credit conditions. One of the key interest rates in world currency markets is the London Interbank Offered Rate (LIBOR), which is actually a series of interest rates on various currencies in London. After a decline from October through late January, the LIBOR rose in February, paying over 11 percent on dollar deposits, up from 9 percent early in January. The increase seemed to justify the bull market (in dollars) of the November-January period. The subsequent decline in interest rates, beginning in early March, seemingly caught traders by surprise.

The perceived threat to the U.S. banking system is the cause for such relaxation by the Fed. The belief became firmly ingrained that the Fed would provide whatever liquidity proved necessary to maintain confidence and to prevent further panic, such as that in Ohio.

The apparent slowdown in economic growth (based on the gross national product estimate of 1.3 percent growth for the first quarter of 1985) has led many to believe that expectations of rising interest rates may not be realized. Pressure on credit markets is assumed to have eased as businesses scale down plans for expansion. The credit supply is, thus, believed to have expanded, while demand for financing has slowed. (David Stallings, World Analysis Branch)

## Government-Assisted Exports Fell in 1984

U.S. agricultural exports assisted by Commodity Credit Corporation (CCC) programs totaled over \$3.6 billion during fiscal year (FY) 1984, down 10 percent from FY 1983's record high of nearly \$4.1 billion (table 14).

The Export Credit Guarantee Program (GSM-102) provides funds to cover financial losses in cases of loan defaults. Under GSM-102, short-term loans of up to 3 years are arranged through commercial banks at prevailing interest rates. In 1983, the Blended Export Credit Enhancement Program (GSM-5) was reactivated and integrated with the GSM-102 program. Up to 20 percent of the credit could be guaranteed under GSM-5 terms, with the remainder through GSM-102. During FY 1984, the United States shipped almost \$3,166 million in commodities under GSM-102 loan guarantees, and another \$472 million moved under GSM-5.

Most of the decline in export loan guarantee assistance in FY 1984 resulted from reductions in coarse grains, oilseeds, and wheat flour, more than offsetting increases for wheat, rice, cotton, and tobacco. Reduced availabilities of U.S. corn and soybeans following the 1983 drought helped decrease exports.

Mexico was the primary destination for shipments under the GSM-102 program, largely shipments in grain sorghum, corn, sunflowerseeds, and soybeans. Other important destinations receiving credit guarantee coverage were Iraq, Korea, Portugal, and Brazil (table 15). (Thomas Warden, World Analysis Branch)

## Exports to USSR Almost Doubled in 1984

Increased U.S. grain exports pushed U.S. agricultural exports to the USSR to over \$2.8 billion in calendar year 1984. Grains accounted for over 90 percent of agricultural exports, and agricultural products accounted for over 85 percent of all U.S. exports to the USSR.

### Grain Exports to USSR More than Doubled

U.S. grain export volume to the USSR approached 18.3 million tons in 1984, more than doubling 1983's level. Grain export value also more than doubled to \$2.6 billion, even though the unit value of wheat exports fell 8 percent. The unit value of corn exports to the USSR rose 3 percent.

The USSR in 1984 was second only to Japan in the amount of U.S. grains imported. The USSR took 16 percent of U.S. grain exports in 1984, up from 7 percent in 1983. The USSR share of U.S. wheat exports rose from 13 percent to 18 percent, and its share of corn exports climbed from 6 percent to 22 percent.

Increased U.S. grain exports to the USSR reflected a rise in both total USSR grain imports and the U.S. share of Soviet grain imports. The Soviets accelerated grain imports in the second half of 1984 as droughts in two key grain producing areas substantially limited domestic grain production. The U.S. Department of Agriculture estimates that Soviet grain output in 1984 dropped more than 10 percent below 1983's estimated level to 170 million tons. The low crop out-turn led to an estimated 11-million-ton increase in grain imports in 1984 to 45 million tons.

### U.S. Share of Soviet Grain Market Reached 40 Percent

The United States, with an additional 10 million tons of grain exports to the USSR in 1984, captured almost all the increase in USSR grain imports. As a result, the U.S. share of the Soviet grain market increased 75 percent, reaching an estimated 40 percent in 1984. The estimated U.S. share of Soviet wheat imports rose from 21 percent in 1983 to 29 percent in 1984, and the share of coarse grain imports rose from 30 percent to 59 percent. Declines in Argentina's shares of Soviet wheat and coarse grain imports offset the U.S. gains. Argentina's shares fell an estimated 11 and 19 percentage points, respectively, between 1983 and 1984. Transportation problems at Argentina's ports may be one reason for the loss, countering the edge that Argentina had because its grain prices were generally lower than those of its major competitors.

### Cotton Exports More than Doubled

U.S. cotton export volume to the USSR more than doubled from 1983 to 1984 to 100,000 tons, following a jump from zero in 1982 to 45,000 tons in 1983. Cotton export values to the USSR paralleled the rise, reaching \$167 million in 1984, and put cotton in second place behind grains.

The increase in U.S. cotton exports reflected an estimated increase in the U.S. share of the Soviet market from 25 percent in 1983 to 54 percent in 1984, rather than an increase in total Soviet cotton imports. Although Soviet cotton production in 1984 fell for the fourth straight year, cotton imports rose only 5 percent.

### Soybean Exports to USSR Fell Sharply

Soybean export values to the USSR dropped from second place in 1984, a position they occupied in both 1983 and 1982. U.S. exports fell from 569,000 tons in 1983 to 46,000 tons in 1984 as Soviet soybean imports from all sources declined from an estimated 1.4 million tons in 1983 to 0.8 million tons in 1984. The Soviets may have cut back soybean and soybean meal imports in 1984 because of their difficulties in handling the record-high volumes they imported in 1983. Argentina and China were the major suppliers in 1984.

### U.S. Agricultural Imports from USSR Up 10 percent

U.S. agricultural imports from the USSR increased 10 percent to \$11 million in 1984, with hides and furskins accounting for more than 90 percent of the value. Agriculture accounted for about 2 percent and light fuel oils and anhydrous ammonia for over 60 percent of total U.S. imports from the USSR.

### 1985 Exports Off to Fast Pace

The large Soviet requirements for imported grain that resulted from the low 1984 USSR harvest continue to buoy U.S. grain exports to the USSR in 1985. In the first 4 months, U.S. grain exports were nearly 3 million tons above shipments during the same period in 1984. Although wheat exports fell 1 million tons, corn exports more than doubled. The increased grain export values did not keep pace with the quantity increase because of an 18-percent decrease in the unit value of corn.

Grains accounted for 93 percent of the \$1.1 billion worth of U.S. agricultural exports to the USSR during January-April 1985. The United States exported no soybeans to the USSR in the first 4 months of 1985. Cotton exports totaled 15,000 tons (\$20 million) compared with 45,000 tons (\$76 million) in January-April 1984. (Carolyn Duff, Eastern Europe and USSR Branch)
